

**Keep MadFest and GreenEXE as in site update inauguration and everything below
Event 1 (Oct 2024)**

Name: GreenEXE 2.0

Description: The flagship software development competition, GreenEXE 2.0 elevated the standard for university-level innovation with its professional structure, industry collaboration with Virtusa and IFS. The event showcased the best development projects from NSBM, giving students real-world exposure, mentorship, and recognition from sponsors and industry leaders.

Event 2 (Feb 2025)

Name: Inauguration 25'

Description: The official appointment ceremony for the new ASE Board, empowering them with responsibility and visibility to lead the upcoming term's initiatives across the university, first initiative for faculty level marketing and official web launch and initiative parallelly

Event 3 (Mar 2025)

Name: Why SE?

Description: A flagship awareness session exploring the value and opportunities of pursuing a BSc in Software Engineering, with insights from industry experts and alumni both an online session covering job roles and exposure and physical session to how to practice and mastering your LinkedIn and landing jobs with GitHub.

Event 4 (Apr 2025)

Name: Game Development Workshop

Description: A technical and creative session that immersed participants in the world of game development, first to be done at the university in that that level since was done by RAM Studios CEO through live demonstrations and interactive learning.

Event 5 (May 2025)

Name: IFS Visit

Description: An exclusive industry exposure visits to IFS Sri Lanka, providing insight into professional software engineering workflows, company culture, and large-scale project management.

Event 6 (Jun 2025)

Name: Subcommittee Selection 2025

Description: Selection and onboarding of new subcommittee members, fostering leadership, creativity, and organizational skills among junior students across generations first to do initiative within faculty.

Event 7 (Jul 2025)

Name: IFS AI & DS Workshop

Description: A collaborative session with IFS, introducing undergraduates to practical applications of Artificial Intelligence and Data Science in the modern software industry done by next level experts on 2 days with comprehensive demos and examples.

Resource persons Program Manager of AI at IFS and Data Scientist at IFS

Event 8 (Aug 2025)

Name: Py League 25'

Description: A friendly programming competition centred around Python, designed to encourage teamwork, problem-solving, and learning through coding challenges.

Event 9 (Sept 2025)

Name: GreenEXE 3.0 – Product Mentorship

Description: The first stage of GreenEXE 3.0 where participants refine their product ideas through structured mentorship, focusing on solution design, feasibility, and innovation. Done by an industry expert with Product Mentorship experience.

Event 10 (Sept 2025)

Name: GreenEXE 3.0 – Research Mentorship

Description: A dedicated mentoring phase to guide participants in integrating research-backed validation and advanced technical concepts into their projects. Done by Dr. Mohamed Shafraz – Associate Professor connecting NSBM roots and years of expertise.

Event 11 (Sept 2025)

Name: GreenEXE 3.0 – Competition Round

Description: The competitive evaluation phase where teams present their developed solutions to a panel of academic and industry judges, emphasizing innovation and execution.

Event 12 (Oct 2025)

Name: GreenEXE 3.0 - Grand Finals

Description: The grand culmination of GreenEXE 3.0, featuring the best projects across the university and awarding the largest prize pool in NSBM development competition history, recognizing creativity, research, and engineering excellence also built on the strongest marketing and incoming project exposure.

Event 13 (Oct 2025)

Name: Subcommittee Badging Ceremony 2025

Description: A formal recognition event organized to officially badge the newly appointed ASE subcommittee members, symbolizing their commitment and responsibilities for the upcoming term. The ceremony celebrated leadership, teamwork, and dedication, motivating new members to contribute toward the association's goals while maintaining the prestige and unity of the ASE.

Event 14 (Nov 2025)

Name: Tech Carnival 25'

Description: Tech Carnival 2025 was organized with a clear vision: to create an exciting, interactive, and educational space that welcomes new students into the dynamic world of the Faculty of Computing while strengthening the community spirit of the Association of Software Engineering (ASE). Driven by our motive to blend fun with technology, the event featured a variety of innovative game stalls, puzzles, arcade challenges, and creative experiences designed to spark curiosity and inspire engagement. Beyond entertainment, the carnival served as a meaningful initiative to raise essential funds for upcoming ASE technical projects, including our CTF event and CSR ventures.

Event 15 (Nov 2025)

Name: Sleigh the Flag Inter-University CTF

Description: Sleigh the Flag Inter University Christmas CTF was built as a vibrant, competitive, and practical learning arena where the brightest young cybersecurity minds of Sri Lanka could test their skills in a never-seen-before Christmas-themed CTF experience crafted entirely by university talent and Legion Offensive Security. What began as a vision to elevate hands-on cybersecurity culture became a phenomenal reality, with the event successfully bringing together over 24 teams from across the nation from state universities such as Vavuniya, Jaffna, Ruhuna, and Sri Jayawardenapura, to leading private institutions including SLIIT, APIIT, ECU, ESU, and many more. The massive participation, the long-distance commitment, and the energy of every team reaffirmed why we built this event to unite the country's top tech minds, ignite collaboration and competition, and take Sri Lanka's cybersecurity spirit to the next level.

Initiative 16 (Dec 2025)

Name: EduSathkara - crowdsourced educational resources platform

Description: Edu Sathkara is a nonprofit, technology-driven educational initiative launched to support Sri Lankan students whose learning was disrupted by Cyclone Ditwah. Designed as a centralized, crowdsourced resource bank, the platform enables students, teachers, and volunteers to share and access essential learning materials such as past papers, notes, textbooks, worksheets, and marking schemes across all grades, subjects, and all three mediums. Built using modern web technologies and a scalable cloud-based architecture, Edu Sathkara ensures easy access, structured categorization, and reliability even during times of crisis. Developed and maintained by the Association of Software Engineering at NSBM Green University, the platform

represents a collective effort to use technology as a force for resilience, equity, and continuity in education.

Event 17 (Dec 2025)

Name: ASE Summit 25'

The ASE Year-End Summit was initiated with a simple yet powerful intention: to place people before positions and relationships before titles. As the Association of Software Engineering, we believe that a strong technical community is built on genuine human connections, and this initiative was designed to bring together both past and present members to strengthen personal bonds and reinforce a family-first culture that goes beyond projects, events, and academic timelines. After a year of shared goals, late nights, challenges, and achievements, this gathering created space to reflect, reconnect, and celebrate the journey we've taken together. Its success was not defined by scale or formality, but by the conversations sparked, the laughter shared, and the sense of belonging that filled the room, reminding us that when people feel connected and valued, communities naturally thrive and move forward as one.
